

SUPPLEMENTAL INFORMATION**MULTISCALE HABITAT FACTORS INFLUENCE THE OCCUPANCY AND
TURNOVER OF THE SUBURBAN HERPETOFAUNA OF CHICAGO,
ILLINOIS, USA**

*KEVIN W. CASSEL, JOHN P. VANEK, GARY A. GLOWACKI, TIMOTHY S. PREUSS, AND
CLAYTON K. NIELSEN*

The following material is provided by the authors and was not subjected to peer review or editing by *Herpetological Conservation and Biology*.

TABLE OF CONTENTS

Appendix I: Directional hypotheses for covariates used to model the detection and occupancy dynamics. Pages 2-.

Appendix II: Complete detection model sets for all species at both spatial scales, including AIC_c, ΔAIC_c, model weights, number of parameters, and -2*log likelihood values. Pages 5-8.

Appendix III: Complete occupancy model sets for all species at both spatial scales, including AIC_c, ΔAIC_c, model weights, number of parameters, and -2*log likelihood values. Pages 9-12.

Appendix IV: Complete colonization and extinction model sets for all species at both spatial scales, including AIC_c, ΔAIC_c, model weights, number of parameters, and -2*log likelihood values. Pages 13-16.

Appendix V: Beta values and standard errors for significant covariates used in dynamic occupancy modeling for all species and both spatial scales. Pages 17-19.

APPENDIX I. Directional hypotheses for covariates used to model the detection and occupancy dynamics of Blue-spotted Salamanders (*Ambystoma laterale*), Eastern Tiger Salamanders (*A. tigrinum*), Common Gartersnakes (*Thamnophis sirtalis*), Green Frogs (*Lithobates clamitans*), Northern Leopard Frogs (*L. pipiens*), Painted Turtles (*Chrysemys picta*), and Snapping Turtles (*Chelydra serpentina*) detected during April-May and July-August 2009-2012 at 27 Lake County Forest Preserve District properties in Lake County, Illinois, USA.

Variable	Description	Hypothesis						
		<i>A. laterale</i>	<i>A. tigrinum</i>	<i>T. sirtalis</i>	<i>L. clamitans</i>	<i>L. pipiens</i>	<i>C. picta</i>	<i>C. serpentina</i>
Group	Two-year group identity (binary)	n/a	n/a	n/a	n/a	n/a	n/a	n/a
Julian	Date of survey	+	+	+	+	+	+	+
Julian ²	Date of survey squared	-	-	-	-	-	-	-
Minutes	Time of day = number of minutes past 0500 hours	+	+	-	n/a	n/a	n/a	n/a
Minutes ²	Time of day ²	-	-	+	n/a	n/a	n/a	n/a
Temp	Temperature (°C) recorded at time of survey	-	-	-	+	+	+	+
Temp ²	Temperature ² (°C)	-	-	+	-	-	-	-
Rain	If raining during survey (binary)	-	-	-	n/a	n/a	n/a	n/a
Wind	If significantly windy during survey (binary)	+	+	+	n/a	n/a	n/a	n/a
Response	If a target species had been detected during a previous visit	+	+	-	n/a	n/a	-	-
Minnow	Number of traps minnow traps	+	+	+	+	+	+	+
Medium	Number of medium hoop nets	+	+	+	+	+	+	+
Large	Number of large hoop nets	+	+	+	+	+	+	+
Survey	Estimated separate detection probabilities for each survey	n/a	n/a	n/a	n/a	n/a	n/a	n/a
Season	Estimated separate detection probabilities for each season	n/a	n/a	n/a	n/a	n/a	n/a	n/a
Effort	Number of sites surveyed on each preserve	+	+	+	+	+	+	+
PC1 _{Aquatic}	indicative of closed canopy ephemeral ponds	n/a	n/a	n/a	+	-	-	-
PC2 _{Aquatic}	indicative of open canopy wetlands	n/a	n/a	n/a	+	+	+	+
PC1 _{Terrestrial}	indicative of closed canopy sparse understory	+	+	-	n/a	n/a	n/a	n/a

PC2 _{Terrestrial}	indicative of tall herbaceous growth, mesic	—	+	+	n/a	n/a	n/a	n/a
PC3 _{Terrestrial}	indicative of short herbaceous growth, old fields	—	+	+	n/a	n/a	n/a	n/a
Bask	Presence (binary) of basking spots (logs, boulders, exposed banks with shallow slopes, etc.)	n/a	n/a	n/a	+	+	+	+
Urban	Distance (m) to nearest urban structure	—	—	—	—	—	+	+
Road	Distance (m) to nearest paved road	—	—	—	—	—	+	+
Prairie	Amount (ha) of prairie habitat within a preserve	—	+	+	—	+	+	+
Forest	Amount (ha) of forest habitat within a preserve	+	+	—	+	—	—	—
Forest_ED	Amount (m/ha) of forest edge within a preserve	+	+	+	—	+	—	—
Shrub	Amount (ha) of shrub habitat within a preserve	n/a	n/a	+	n/a	n/a	n/a	n/a
Wetland	Amount (ha) of wetland	—	+	+	+	+	+	+
Wetland_ED	Amount (m/ha) of wetland edge within a preserve	+	+	+	+	+	+	+
Urban_Buffer	Percentage of 100-m buffer around a preserve comprised of urban structure	—	—	—	—	—	—	—
Road_Buffer	Density (m/ha) of paved roads within a 100 m buffer around the preserve	—	—	—	—	—	—	—
Isolation	Average distance (km) between each preserve and all other preserves	—	—	—	—	—	—	—

APPENDIX II. Complete detection (p) model sets at 2 spatial scales (local and landscape) for Blue-spotted Salamanders (*Ambystoma laterale*), Eastern Tiger Salamanders (*A. tigrinum*), Common Gartersnakes (*Thamnophis sirtalis*), Green Frogs (*Lithobates clamitans*), Northern Leopard Frogs (*L. pipiens*), Painted Turtles (*Chrysemys picta*), and Snapping Turtles (*Chelydra serpentina*) from April-May and July-August 2009-2012 on 27 Lake County Forest Preserve District properties in Lake County, Illinois, USA. While estimating p for each species at each scale, colonization and extinction were held constant (null). See Tables 2 and 3 for covariate descriptions.

^aAkaike Information Criterion adjusted for small samples. ^bDifference in current model from the top model. ^cModel weight, interpreted as the relative model likelihood. ^dNumber of model parameters estimated. ^e $-2\text{Log}(Likelihood)$, interpreted as a measure of model fit.

APPENDIX III. Complete occupancy (ψ) model sets at 2 spatial scales (local and landscape) for Blue-spotted Salamanders (*Ambystoma laterale*), Eastern Tiger Salamanders (*A. tigrinum*), Common Gartersnakes (*Thamnophis sirtalis*), Green Frogs (*Lithobates clamitans*), Northern Leopard Frogs (*L. pipiens*), Painted Turtles (*Chrysemys picta*), and Snapping Turtles (*Chelydra serpentina*) from April-May and July-August 2009-2012 on 27 Lake County Forest Preserve District properties in Lake County, Illinois, USA. While estimating ψ for each species at each scale, colonization and extinction were held constant (null) while the most parsimonious detectability models from each scale were held constant (Appendix III). See Tables 2 and 3 for covariate descriptions.

^aAkaike Information Criterion adjusted for small samples. ^bDifference in current model from the top model. ^cModel weight, interpreted as the relative model likelihood. ^dNumber of model parameters estimated. ^e $-2\text{Log}(Likelihood)$, interpreted as a measure of model fit.

APPENDIX IV. Complete colonization (γ) and extinction (ε) model sets at 2 spatial scales (local and landscape) for Blue-spotted Salamanders (*Ambystoma laterale*), Eastern Tiger Salamanders (*A. tigrinum*), Common Gartersnakes (*Thamnophis sirtalis*), Green Frogs (*Lithobates clamitans*), Northern Leopard Frogs (*L. pipiens*), Painted Turtles (*Chrysemys picta*), and Snapping Turtles (*Chelydra serpentina*) from April-May and July-August 2009-2012 on 27 Lake County Forest Preserve District properties in Lake County, Illinois, USA. While estimating γ or ε for each species at each scale, the most parsimonious local and landscape detectability (p , Appendix 3) and site occupancy (ψ , Appendix 4) models were held constant. See Tables 2 and 3 for covariate descriptions.

Species (scale, parameter) Model	AIC_c^a	ΔAIC_c^b	ω^c	K^d	$-2\log(L)^e$
<i>A. laterale</i> (local, $\gamma \approx \varepsilon$)	n/a	n/a	n/a	n/a	n/a
